

Abdullah

Software Engineer

github.com/just-abdullah-dev | candidates.intervues.club/u/abdullah

SUMMARY

Software Engineer with experience founding and building full-stack, cross-platform applications across logistics, healthcare, e-commerce, and enterprise management systems. Proficient in Next.js, React Native, TypeScript, Node.js, and multi-database architectures including Supabase, PostgreSQL, and MongoDB.

EXPERIENCE

Founder — Full Stack Engineer

GateTak

Jul 2026 – Present

- Founded a city-wide delivery and logistics platform, developing three React Native applications for customers, riders, and vendors deployed on the Play Store and App Store.
- Architected and deployed a Next.js administrative control panel to manage multi-entity workflows, order processing, vendors, and riders using Supabase.

Founder — Full Stack Engineer

GateTak

Jul 2026 – Present

- Founded a city-wide delivery and logistics platform, developing three React Native applications for customers, riders, and vendors deployed on the Play Store and App Store.
- Architected and deployed a Next.js administrative control panel to manage multi-entity workflows, order processing, vendors, and riders using Supabase.

Founder | Full Stack Engineer

GateTak - On-site Delivery Startup

Jul 2026 – Present

- Founded GateTak, a city-wide delivery and logistics platform for Haripur, building three separate React Native apps for customers, riders, and vendors/restaurants, backed by a Supabase database.
- Built the admin panel in Next.js for managing orders, vendors, and riders across the platform.
- Serving as full stack engineer across the entire stack, web and mobile.

Full Stack Developer

Peregrine Ventures AI

Oct 2025 – Jun 2026

- Engineered a B2B veterinary ordering and clinic management platform with custom prescription workflows for 50+ clinics, reducing manual processing by 40%.
- Developed a dynamic pricing engine providing support for clinic-specific pricing rules and product-level price overrides.
- Built a integrated telehealth platform incorporating video calls, chat, appointment booking, AI transcription, and automated visit summaries.
- Implemented secure JWT authentication and role-based access control (RBAC) across admin and clinic user roles.

Software Engineer Intern

Mahhir 360

Jul 2025 – Sep 2025

- Developed an internal multi-branch task tracking system to coordinate restaurant chain employees across multiple cities.
- Designed and deployed a Supabase backend database, structuring schema data models and APIs for distributed task assignment.

Full Stack Developer

Inostrik

Feb 2025 – Jun 2025

- Delivered a dynamic CMS for blog and banner management alongside an events platform featuring QR-based voucher redemptions and tiered subscriptions using Next.js, TypeScript, and Supabase.
- Optimized server-side rendering (SSR) and database query execution strategies, reducing page load times on content-heavy interfaces.

Full Stack Developer

Raqqamiyya (Nigotis)

Oct 2024 – Jan 2025

- Built an accounting and business management system handling automated invoicing, payroll processing, and asset tracking for enterprise SME clients.

- Configured secure authentication mechanisms with fine-grained role-based access control (RBAC) and tuned MongoDB queries to process large ledger datasets with low latency.

Full Stack Developer

Inostrik

Sep 2024 – Sep 2024

- Delivered a dynamic CMS for blog and banner management alongside an events platform featuring QR-based voucher redemptions and tiered subscriptions using Next.js, TypeScript, and Supabase.
- Optimized server-side rendering (SSR) and database query execution strategies, reducing page load times on content-heavy interfaces.

Frontend Developer Intern

Powersoft19

Jul 2024 – Aug 2024

- Constructed modular, reusable UI components for a healthcare management system utilizing React and Tailwind CSS.
- Refactored frontend components in collaboration with senior developers to improve screen rendering speeds and interface accessibility.

Frontend Developer Intern

Powersoft19

Jul 2024 – Aug 2024

- Constructed modular, reusable UI components for a healthcare management system utilizing React and Tailwind CSS.
- Refactored frontend components in collaboration with senior developers to improve screen rendering speeds and interface accessibility.

EDUCATION

Pak-Austria Fachhochschule (PAF-IAST) · Bachelor's degree · 2022 – 2026

SKILLS

Languages and Frameworks: CSS, Express.js, FastAPI, Framer Motion, HTML, JavaScript, Nest.js, Next.js, Node.js, Python, React, React Native, Redux, Tailwind CSS, TypeScript

Databases: MongoDB, MySQL, PostgreSQL, Supabase

Tools: AWS S3, Docker, Expo, GCP, Git, GitHub, Multi-tenancy, Prisma ORM, RBAC, REST APIs, SaaS Architecture, SSR, Vercel

PROJECTS

AI final year project in medical imaging

Published AI research project focused on medical imaging applications. Published research focusing on medical imaging AI solutions.

Additional projects: Astra Wellness Telehealth, Nigotis Accounting Software & SME Business Management System, Sehat-AI, Aban Edu, Aban Arena

AWARDS

Dean's List recipient, Teaching Assistant, Dean's List (4x), Full & Half Merit Scholarships, Prime Minister Laptop Award, JavaScript for Web Development, Modern JavaScript: ES6 Basics, HTML, CSS, and JavaScript for Web Developers, Learn React.js, 4× Dean's List, Published AI final year project in medical imaging
