SUMMARY

Software Engineer specializing in Frontend Development with extensive experience building scalable web applications, design systems, and consumer platforms. Proven track record in optimizing performance for millions of monthly active users, migrating legacy codebases, and leading frontend architecture initiatives.

EXPERIENCE

SDE-II (Frontend)

Spinny

Feb 2022 – Feb 2024

- Architected enterprise design systems and owned end-to-end development of a WhatsApp automation builder platform.
- Led consumer-platform performance optimization initiatives catering to ~4M monthly active users.
- Mentored junior software engineers on engineering best practices and frontend architecture.

SDE-II (Frontend)

Spinny

Nov 2021 – Feb 2022

- Architected enterprise design systems and owned end-to-end development of a WhatsApp automation builder platform.
- Led consumer-platform performance optimization initiatives catering to ~4M monthly active users.
- Mentored junior software engineers on engineering best practices and frontend architecture.

Software Engineer (Frontend)

Brevo (formerly Sendinblue)

Feb 2021 – Oct 2021

- Migrated legacy JavaScript codebases to modular React and TypeScript.
- Improved engineering onboarding documentation to streamline developer integration.
- Supported data-informed UI improvements to boost application usability.

Software Engineer

Navyug Infosolutions

May 2018 – Feb 2021

- Managed product enhancements and engineered client projects from scratch.
- Mentored software engineering interns.

Software Engineer

Navyug Infosolutions

Feb 2018 – May 2018

- Managed product enhancements and engineered client projects from scratch.
- Mentored software engineering interns.

EDUCATION

Dr. A.P.J. Abdul Kalam Technical University · B.Tech · 2014 – 2018

SKILLS

Languages and Frameworks: CSS, CSS3, HTML, HTML5, Java, JavaScript, JavaScript (ES6+), Semantic HTML, TypeScript, Ember.js, Next.js, React Flow, React Native, React Query, React.js, Redux, Tailwind CSS, Zustand
Tools: CI/CD, Code Splitting, Component Architecture, Core Web Vitals (LCP/CLS/INP), Design Systems, Frontend System Design, Git, Lazy Loading, Micro-Frontends, React Profiler, Storybook, Vite, Webpack

PROJECTS

Truebil Login and OTP Flow Revamp

Revamped Truebil's login and OTP flow using analytics and frontend profiling.

Legacy Codebase Migration

Migrated a legacy JavaScript codebase to modular React and TypeScript.

AWARDS

Agentic Frontend Development with Codex Certification
