

Harshad Prajapati

Full-stack Developer

github.com/harshad00 | candidates.intervues.club/u/harshad-prajapati

SUMMARY

Full-stack Developer with experience in MERN stack and Next.js/TypeScript application development. Proven track record in designing REST APIs, optimizing MongoDB data schemas, and building responsive user interfaces. Skilled in full-stack project execution and mentoring developers in modern web technologies.

EXPERIENCE

Programmer in MERN Stack

Sarvajanik BCA & PGDCA College

Aug 2024 – Present

- Engineered full stack web applications using the MERN stack, including a Student Attendance Management System and a Library Management System.
- Developed REST APIs and MongoDB schemas while implementing CRUD operations, JWT authentication, and role-based access control.
- Constructed responsive React.js user interfaces, debugged issues, and optimized front-end performance.
- Mentored students in MERN stack development best practices and concepts.

Full Stack Developer (Internship)

TheBoringEducation

Jan 2024 – Jun 2024

- Spearheaded the development and maintenance of high-performance Next.js and TypeScript applications.
- Collaborated with cross-functional teams to implement core features, resolve software bugs, and refine UI/UX design components.
- Managed and optimized database schemas using MongoDB.

EDUCATION

Parul University · MCA · 2022 – 2024

Hemchandracharya North Gujarat University · BACHELOR · 2019 – 2022

SKILLS

Languages and Frameworks: CSS, HTML, JavaScript, Python, TypeScript, Bootstrap, Express.js, HBS (Handlebars), MERN stack, Next.js, Node.js, React.js, Tailwind CSS

Databases: MongoDB, MySQLs

Tools: Appwrite, Gemini AI API, GitHub OAuth, GitHub REST API, GSAP, JWT auth, REST APIs, Role-based access control, YouTube API

PROJECTS

YouFocus

Engineered a learning platform utilizing Next.js, TypeScript, and MongoDB, integrating the YouTube API to enhance learner concentration. Engineered a platform utilizing Next.js, TypeScript, and MongoDB, integrating the YouTube API to enhance learner concentration. Next.js, TypeScript, MongoDB, YouTube API

GHTrackr – AI-Powered GitHub Work Tracker

Developed a full-stack GitHub activity tracking system to automatically fetch daily commits via the GitHub API and store commit history in MongoDB. Integrated Google Gemini AI to analyze contributions. Developed a full-stack GitHub activity tracking system to automatically fetch daily commits via the GitHub API and store commit history in MongoDB. Integrated Google Gemini AI, GitHub OAuth, and JWT authentication to provide automated contribution tracking.

React.js, Node.js, Express.js, GitHub OAuth, JWT, Gemini AI API, GitHub REST API

OMG – Optical & Gift Articles Store

A complete full-stack e-commerce website built to sell optical products and gift articles online. Built a complete full-stack e-commerce platform for optical products and gift articles using Node.js, Express.js, and MongoDB. Designed backend routing, business logic, and server-side rendering with HBS, CSS, and Bootstrap.

Node.js, Express.js, MongoDB, HBS, CSS, Bootstrap, JavaScript
