

Lakshay

Software Engineer

github.com/lakshayknows | candidates.intervues.club/u/lakshay

SUMMARY

Software Engineer with background in AI Systems Engineering, full-stack web and mobile development, and agentic workflows. Proven track record shipping production B2B SaaS applications, REST APIs, and automated systems across cloud platforms including Azure, Supabase, and Vercel.

EXPERIENCE

Founder & AI Systems Engineer

Brandstac

May 2026 – Present

- Shipped 7 end-to-end production client projects across B2B SaaS, climate-tech, D2C commerce, and marketplace domains.
- Architected and deployed application platforms using Next.js and FastAPI across Azure, Supabase, and Vercel infrastructure.
- Designed over 5 REST APIs and implemented agentic workflows that reduced development cycle times by 30–40%.
- Managed marketplace acquisition strategies and implemented technical SEO optimizations.

Software Engineer Intern

Dotko.in

Apr 2026 – Present

- Engineered full-stack features and published the Android application for a live B2B SaaS product.
- Managed CI/CD pipelines, automated deployment workflows, and set up production monitoring for active revenue-generating users.

AI & Full-Stack Engineer

Freelance

Jan 2025 – Present

- Engineered 2 production billing systems using Next.js, Python, Azure, and Cosmos DB to process multi-step financial workflows across 3+ environments.
- Launched a full-stack eCommerce application featuring Google OAuth authentication and Supabase database integration on Vercel.

Event Coordinator - Choose France Tour

Embassy of France in India

Jan 2023 – Jan 2023

- Coordinated an annual recruitment fair for over 1,000 prospective students, streamlining communication protocols to increase attendee satisfaction by 25%.

Graphic Design Volunteer

Climate Front India

Jan 2022 – Present

- Designed graphical assets and visual media for environmental awareness initiatives.

Head Graphic Designer

Light2Guide

Jul 2021 – Apr 2024

- Directed the design team in executing marketing campaigns, presentations, and digital media collateral while managing workflow pipelines.

EDUCATION

P.G.D.A.V. College, University of Delhi · B.Com (Honours) · 2023 – 2026

SKILLS

Languages and Frameworks: JavaScript/TypeScript, Python, SQL, FastAPI, LangChain, LangGraph, Next.js, Node.js, React

Databases: Cosmos DB, PostgreSQL

Tools: agentic workflows, Azure, CI/CD, Claude Code & sub-agents, deployment automation, MCP servers, OAuth, production monitoring, RAG pipelines, real-time speech pipelines, REST API design, Shopify, Supabase, Vercel

PROJECTS

AutoJob

Agentic job automation system across 5+ RAG pipelines using LangGraph and LangChain. Constructed agentic automation routines over 5+ RAG pipelines, optimizing architecture to decrease LLM API consumption by 45%.

LangGraph, LangChain

Additional projects: FollowThroo, KarbonZ

AWARDS

GDG HackFest Runner-Up, Vista AI — LLM Workflows Certification, Vista Equity — AI in Action Certification, Kaggle Python Certification, OSoC'25 Certification
