SUMMARY

Software Engineer with experience in backend development using Core Java, Spring Boot, and RESTful APIs. Demonstrated expertise in building reliable endpoints, debugging multi-layer application failures, and implementing secure role-based workflows. Holds a Bachelor of Technology degree and is proficient in Java, SQL, MySQL, and backend tools like Git, Maven, and Postman.

EXPERIENCE

Java Backend Intern

TechEazy Consulting Pvt. Ltd.

Jun 2026 – Aug 2026

- Developed backend applications using Spring Boot, contributing to REST API development for URL generation, redirects, and user management.
- Debugged inconsistent API failures by tracing requests across application layers, identifying unvalidated edge-case inputs to improve endpoint reliability.
- Collaborated with senior developers on production-level code, implementing features, performing code reviews, and maintaining system reliability.

EDUCATION

Guru Nanak Dev Engineering College Ludhiana, Punjab · Bachelor of Technology · 2021 – 2025

SKILLS

Languages and Frameworks: Core Java, Java, SQL, Hibernate, JPA, Spring Boot, Spring Security

Databases: MySQL

Tools: Git, GitHub, IntelliJ IDEA, Maven, Postman, REST APIs

PROJECTS

SnipLytx URL Shortener

Built an end-to-end URL shortening platform implementing 5 core workflows using Java 21, Spring Boot, Spring Security, and JWT. Implemented 5 core workflows including user authentication, URL creation, redirects, link management, and click tracking analytics.

Java 21, Spring Boot, Spring Security, JWT

GitHub

Complaint Management System

Developed a role-based complaint management system using Spring Boot, Spring Data JPA, and Java. Designed and implemented 8 REST endpoints for complaint creation, tracking, assignment, and status updates.

Java, Spring Boot, Spring Data JPA
