

Shaswat Dubey

Full Stack Developer

candidates.intervues.club/u/shaswat-dubey

SUMMARY

Full Stack Developer with hands-on experience building, maintaining, and deploying responsive web applications across diverse client projects and full-stack environments. Skilled in engineering modern interfaces and scalable backend integrations using React, Node.js, TypeScript, and database technologies. Demonstrates a strong track record of optimizing front-end performance, integrating REST APIs, and implementing secure workflows.

EXPERIENCE

Freelance Web Developer

Independent Clients

Dec 2025 – Jun 2026

- Developed and deployed responsive web interfaces using React.js, JavaScript, and Bootstrap tailored to client specifications.
- Integrated third-party REST APIs alongside robust data loading and error-handling workflows to enhance system reliability.
- Engineered mobile-first layouts and verified cross-device design consistency across various screen dimensions.

Web Developer

Empretus Technologies, Prayagraj

Jan 2022 – Dec 2022

- Built and maintained responsive web application interfaces utilizing HTML5, CSS3, JavaScript, and Bootstrap.
- Engineered reusable React UI components and unified responsive styling standards across desktop and mobile platforms.
- Optimized asset bundles and image resources, decreasing initial page load time from 3.2s to 1.8s.

EDUCATION

Galgotias University, Greater Noida · Master of Computer Applications · 2023 – 2025

Prof. Rajendra Singh University, Prayagraj · Bachelor of Commerce · 2019 – 2022

SKILLS

Languages and Frameworks: Async/Await, CSS3, HTML5, JavaScript (ES6+), TypeScript, Bootstrap, Express.js, Node.js, React Router, React.js, Tailwind CSS

Databases: MongoDB, MySQL

Tools: CORS Configuration, Environment Variables, Error Handling, Git, GitHub, GitHub Actions, JWT Authentication, Middleware, MongoDB Atlas, Mongoose, npm, Postman, RBAC, Render, Responsive Design, REST APIs, Vercel, Zod Validation

PROJECTS

SafeWatch — Multi-Tenant Security Monitoring Platform

Built a full-stack platform to monitor security events, review risk scores, and manage severity-ranked alerts. Architected security platform using React, TypeScript, Node.js, Express, MongoDB, and JWT. Implemented JWT authentication and role-based access control (RBAC) to enforce multi-tenant authorization.

React, TypeScript, Node.js, Express, MongoDB, JWT

AgentFlow — AI-Powered Recruitment Workflow Platform

Created a recruitment dashboard covering job creation, resume intake, candidate matching and scoring, shortlisting, interview feedback, and hiring decisions. Constructed reusable React UI components to manage end-to-end hiring workflows using JavaScript and CSS3.

React.js, JavaScript, CSS3

Crypto Coin Tracker

Integrated cryptocurrency prices, market capitalization, and 24-hour volume with search, dynamic filtering, loading states, and API error handling. Connected application with CoinGecko REST API using React.js and Bootstrap to deliver dynamic real-time market data.

React.js, CoinGecko REST API, Bootstrap
