SUMMARY

Driven software engineer focused on solving complex technical challenges. Specializes in building production-oriented software, intelligent agent systems, and scalable cloud infrastructure. Demonstrates strong problem-solving capabilities across full-stack development and AI/ML domains.

EXPERIENCE

Full-Stack and AI/ML hobby dev

Self-Employed / Hobby Developer

- Engineered production-oriented software, intelligent agent systems, and scalable cloud infrastructure.

SKILLS

Languages and Frameworks: Python, Electron, Next.js, Node.js, React, Three.js

Databases: MongoDB

Tools: backend infrastructure, Blender, Blender automation, data quality and validation pipelines, deployment, real-time communication systems, system architecture, WebRTC, WebSockets

PROJECTS

XeroKraken — AI Engineering Environment

Building a desktop engineering platform integrating AI coding agents, tool orchestration, local development workflows, plugins, and automated engineering processes. Architected a desktop engineering platform integrating AI coding agents and tool orchestration. Developed workflows for local development, plugin management, and automated engineering processes.

XeroAgni — Cloud Computing & Gaming Platform

Developing a cloud-based platform for remote virtual machines, interactive desktop sessions, and cloud gaming, with session persistence, GPU-enabled compute, and browser-accessible interfaces. Engineered a cloud platform supporting remote virtual machines, interactive desktop sessions, and cloud gaming. Implemented GPU-enabled compute capabilities, session persistence, and browser-accessible interfaces.

Portfolio

Personal portfolio website. Designed and deployed a personal portfolio website showcasing software projects and skills.
